Refinished Bathtub Aftercare Instructions

Thank you for using TubFusioN for your refinishing needs.
Please follow these instructions to maintain a quality finish for years to come.
For further instructions please refer to our website at **www.tubfusion.com** and see the “aftercare” section for details.

Cleaning:

1. Use mild detergent and soft sponge or cloth. Some suggestions would be diluted dish soap, wipe down with cloth or sponge. Or use scrubbing bubbles. Let sit for a minute or two then wipe with cloth and rinse thoroughly.
2. NEVER use abrasive cleansers or scrubbers!! This will scratch and damage finish. NO Comet, soft scrub, or any other cleansers with an abrasive texture.

Things that will VOID WARRANTY:

1. Suction cup bath mats. - These will ruin your finish. Only use mats that have NO suction cups. These can be found on Amazon.
2. Any kind of abrasive cleansers or scotch brite pads.
3. Allowing soap or shampoo to sit on tub finish for extended periods of time. For example, shampoo bottle leaks down the side of bottle onto the side of the tub and sits for days. This will cause finish to fail. Always rinse and/or wipe down regularly and thoroughly.
4. Leaking faucets. If water sits for long periods of time due to faucet leaking, this will cause finish to fail. Be sure spout or shower head does not leak. If you are a renter/resident please contact maintenance if this happens.
5. Not cleaning your tub regularly and thoroughly. Excessive soap scum for long periods of time will damage finish.
6. Things that drop and damage finish such as razors, bottles, bath toys, etc.
